

# Sirris – Expert Generative AI & Large Language Models (LLMs)

## We are looking for a Specialist Generative AI & Large Language Models (LLMs)

Do you feel passionate about the potential of generative AI and large language models (LLMs)? Do you want to help businesses achieve their ambitions and get ready for the future by developing ground breaking solutions with these technologies? If so, this job at Sirris is for you!

Sirris, the innovation centre of and for the technology industry in Belgium, is looking for a motivated colleague to take our expertise in generative AI to the next level. You will help businesses create innovative applications and create new value using LLMs.

### What are your responsibilities?

- Developing and tuning large language models (LLMs) to help businesses with their specific challenges and opportunities.
- Building proof-of-concept solutions to demonstrate the possibilities of generative AI.
- Providing technical guidance with integrating AI solutions into existing business processes.
- Giving advice on cost estimates, feasibility and implementation strategies for AI projects.
- Working actively with colleagues and businesses to resolve technical and strategic issues
- Participating in building knowledge and expertise around generative AI within Sirris and disseminating this to our industrial partners.

### What do we expect from you?

- A master's degree in computer science, artificial intelligence, data science or an equivalent background.
- At least one year of professional work experience with machine learning and generative AI technology, with a specific focus on LLMs
- Practical experience in developing, fine-tuning and implementing AI models (e.g. RAG or LLaMA).
- Experience with at least one of the following tools and frameworks is a plus: Hugging Face, LangChain, CrewAI or AWS Bedrock
- Strong analytical and problem-solving skills combined with a pragmatic approach.
- Excellent communication skills and a customer-oriented mindset.
- Fluency in Dutch or French, with a good knowledge of English.

### What do we offer you?

- Here at Sirris, innovation and collaboration are central. You will be in an environment where technological progress and sustainability go hand in hand. Together we will help prepare businesses for the future.
- An exciting position in a dynamic and innovative team.

- The opportunity to work with leading businesses and technology experts.
- A stimulating environment in which you can extend your expertise further.
- Flexible working hours and the opportunity to work on one of our sites in Belgium or partially from home.
- A competitive salary package with fringe benefits.

**Interested?**
